

BIG-BORE HOSES - CONNECTIONS

Connections, socket ends and flange dimensions

Applications:

Cement plants, Construction industry, General offshore applications, Iron and steel industry, Large tank units, Material handling, Mining industry

Description:

ContiTech offers the following connection types:

- Split flange, e.g. compact conveyor hose systems
- Integral rubber flange, optional with steel backing flange
- Integral steel flange, concealed attachment, vulcanized in, without lining drawn through
- Beaded end with swivel steel backing flange

The dimensions of the expanded joints are manufactured according to your specifications. Flange dimensions are to be matched to the required connections.
